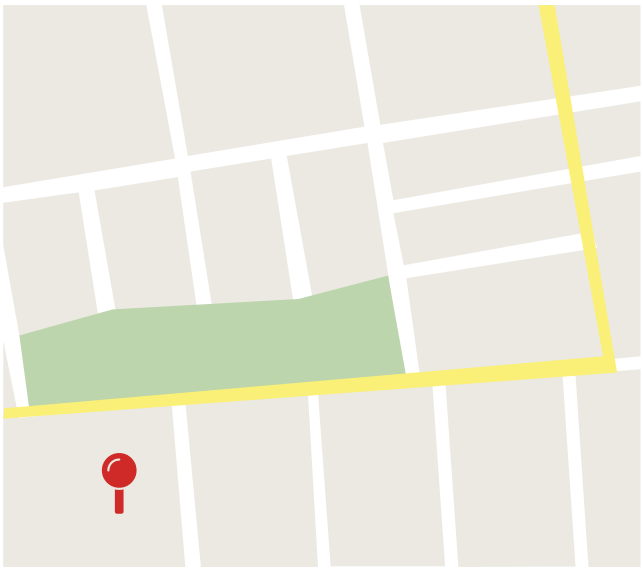
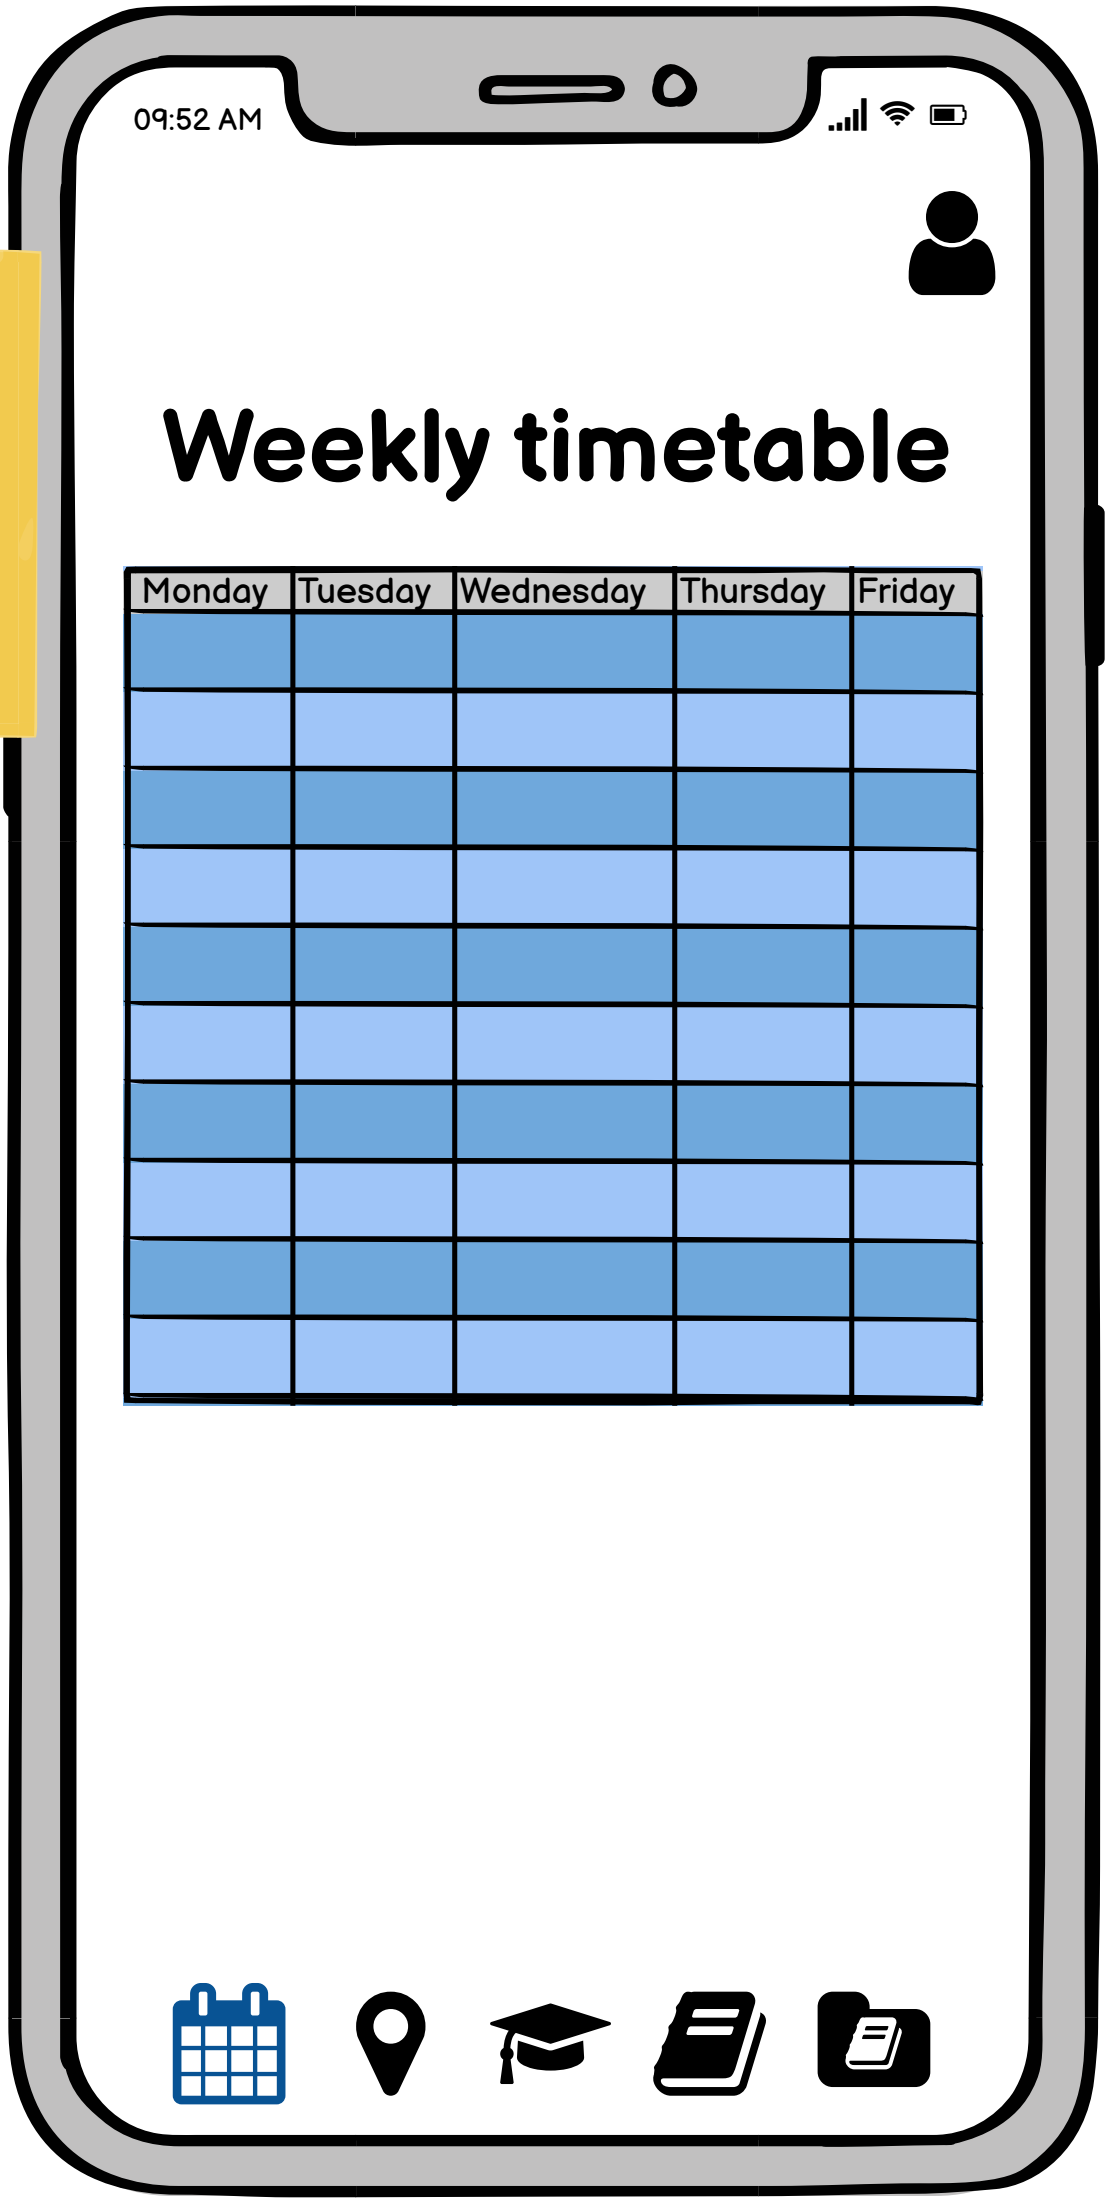
# University Map



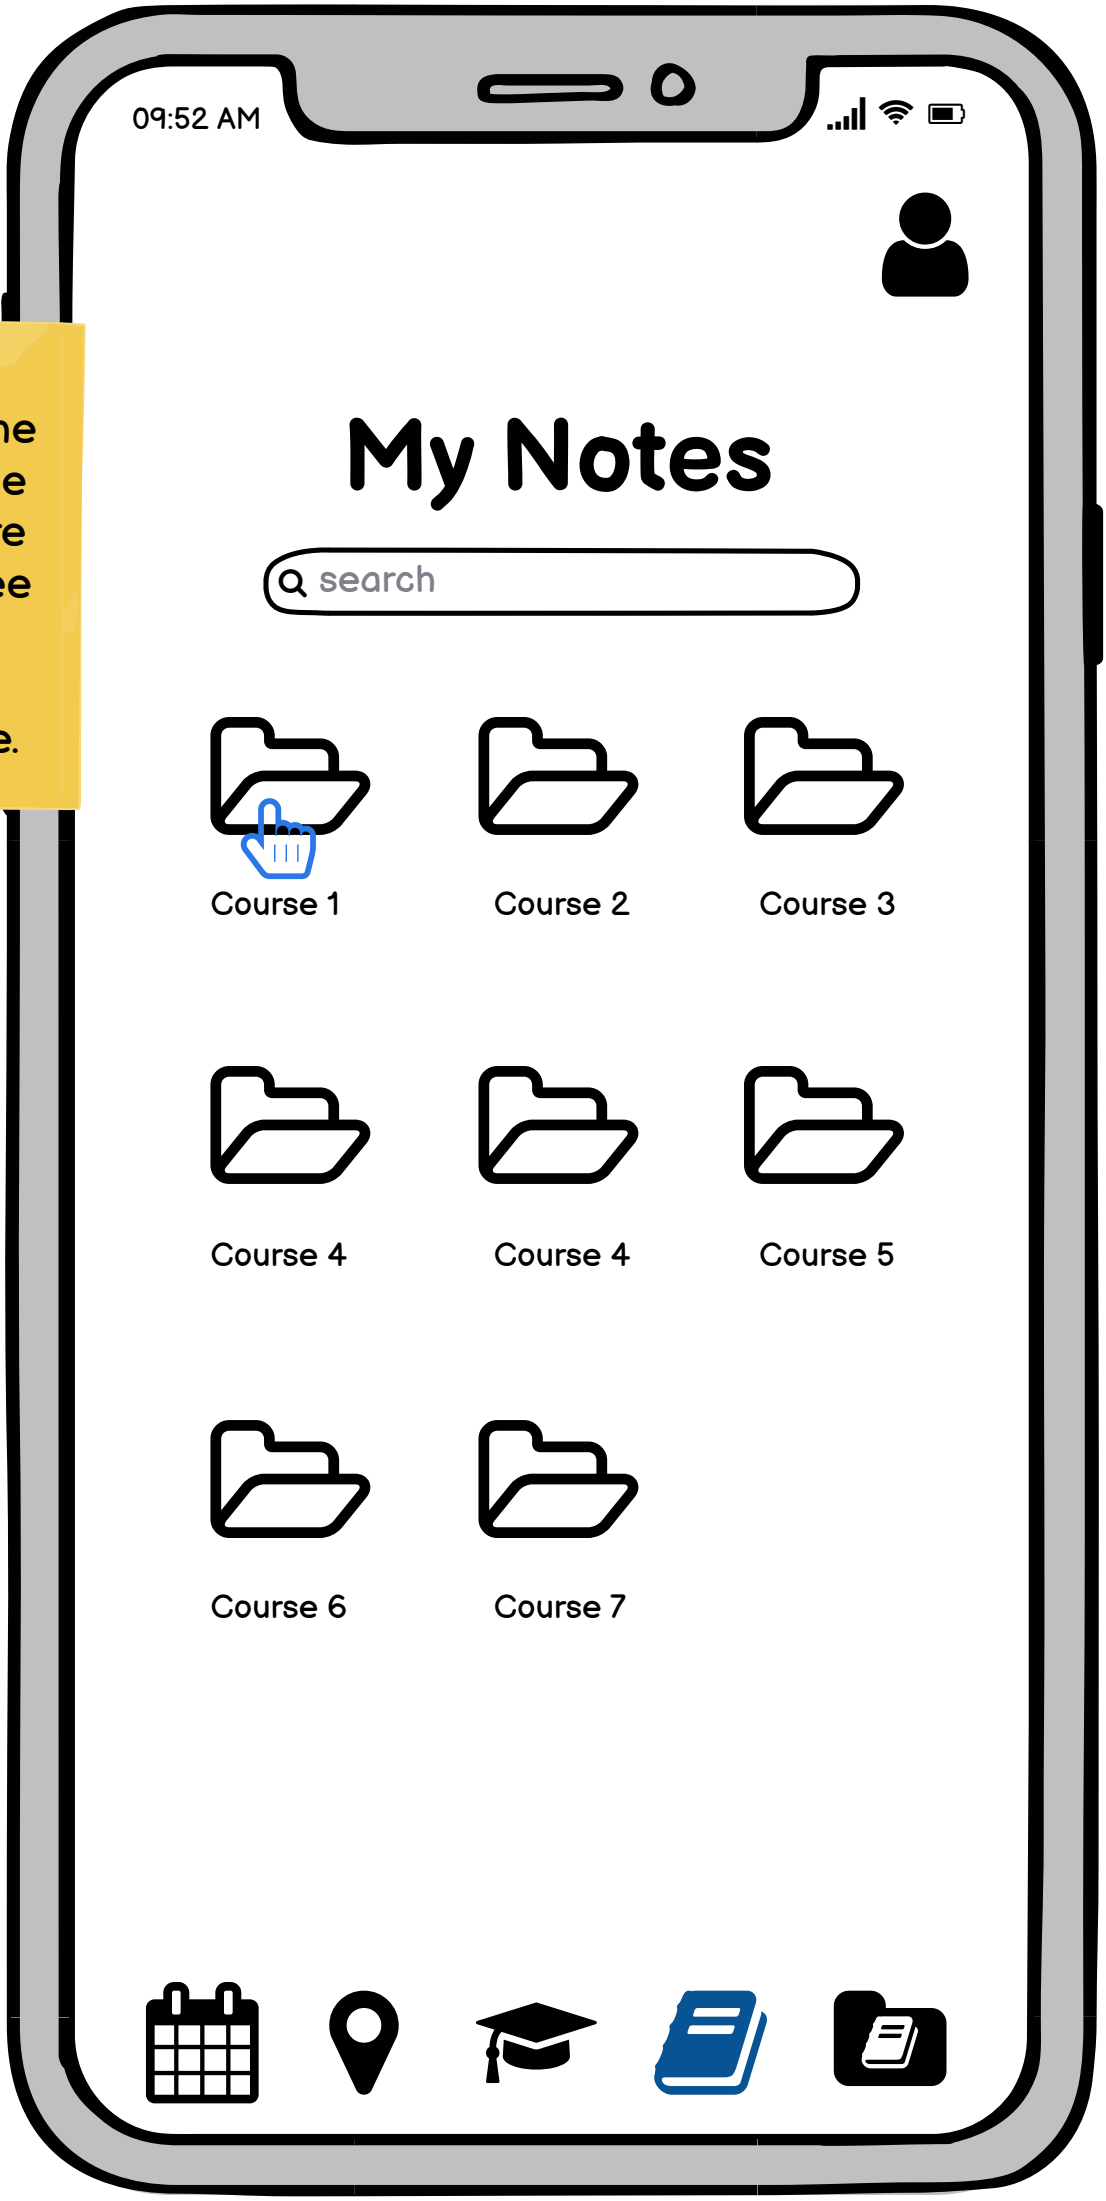
Select the building

Insert the room code

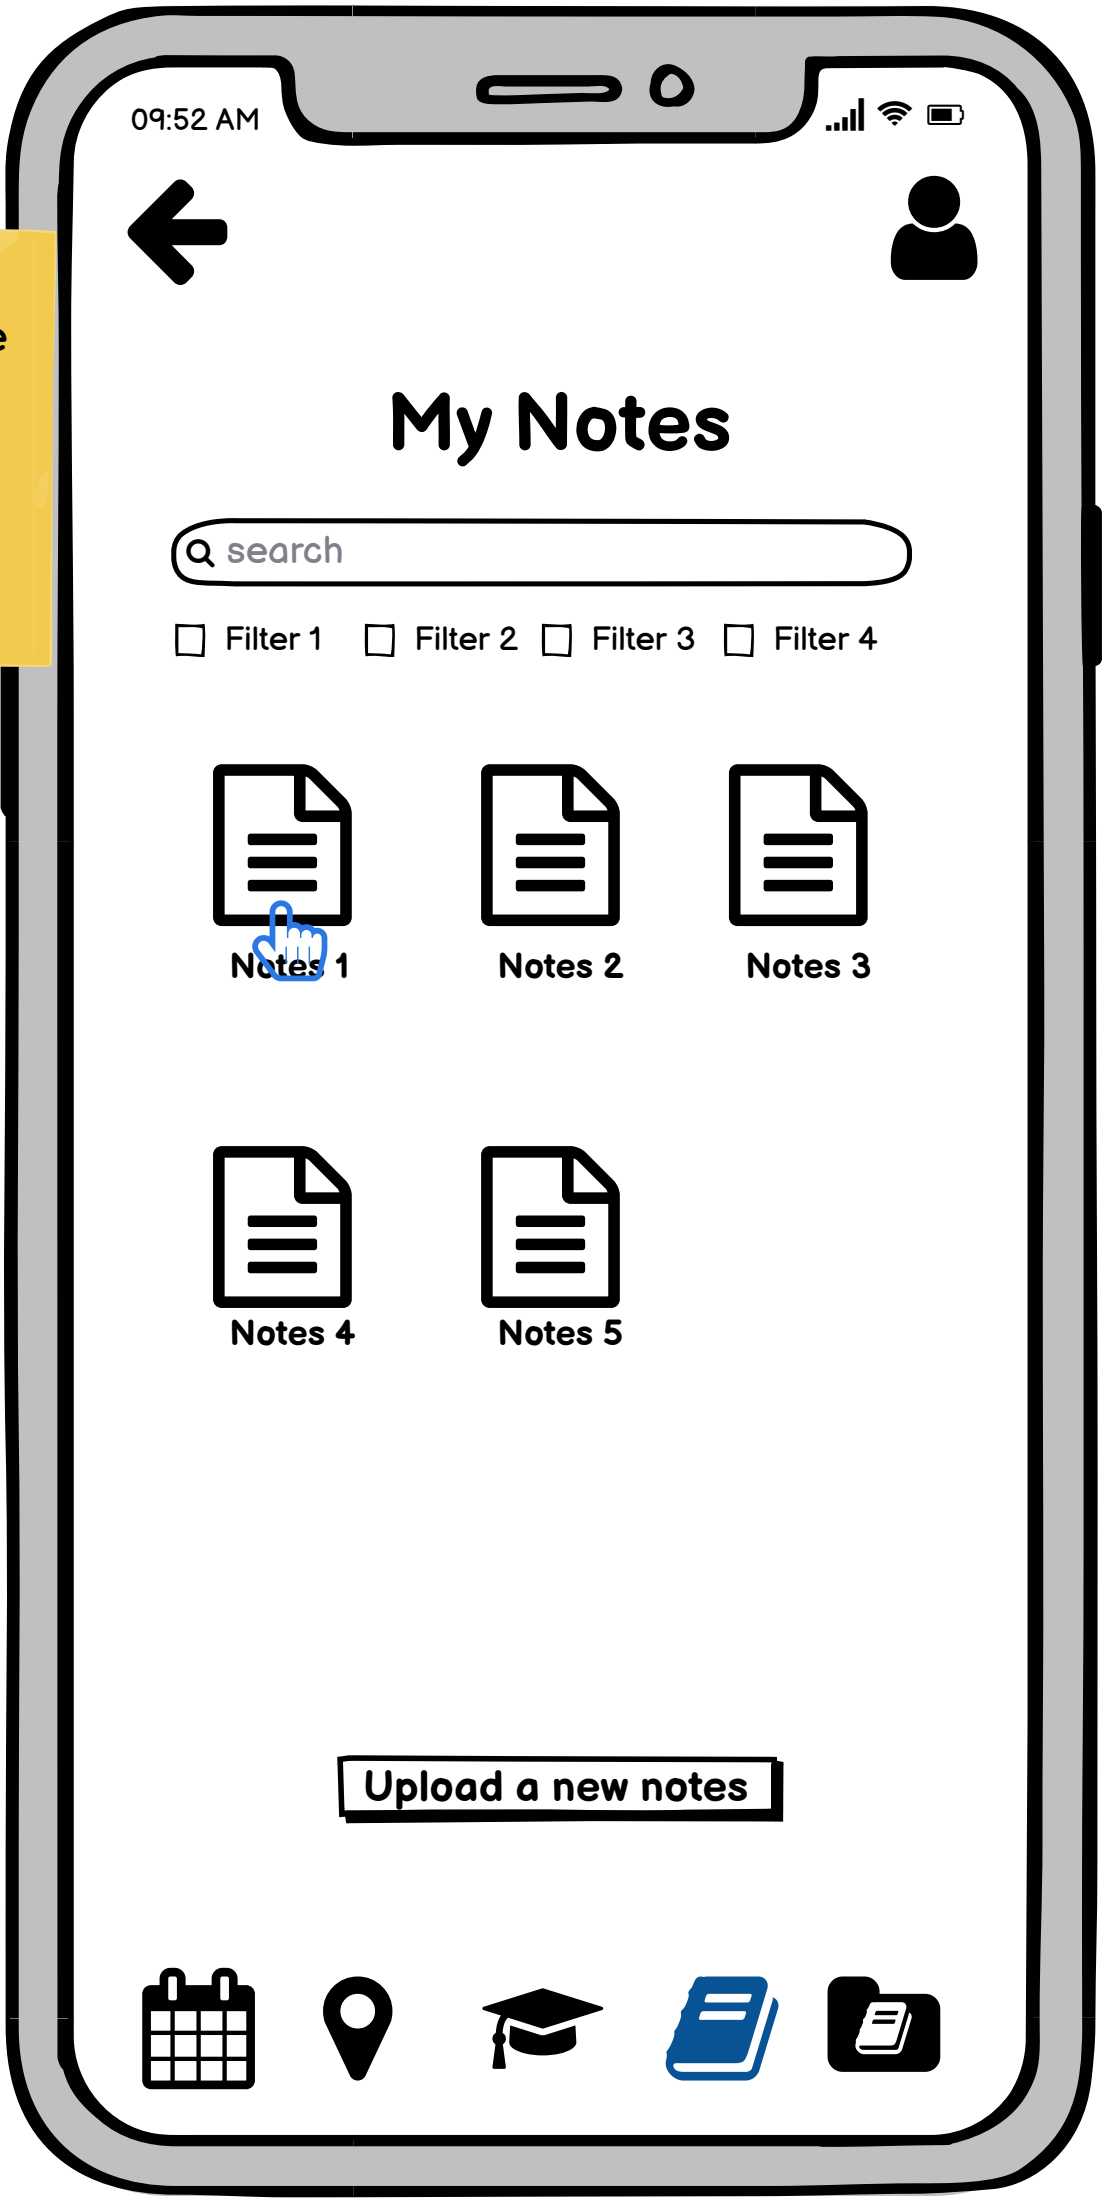
This page is opened when the user click on the timetable icon. Here the user can see his weekly lessons schedule.



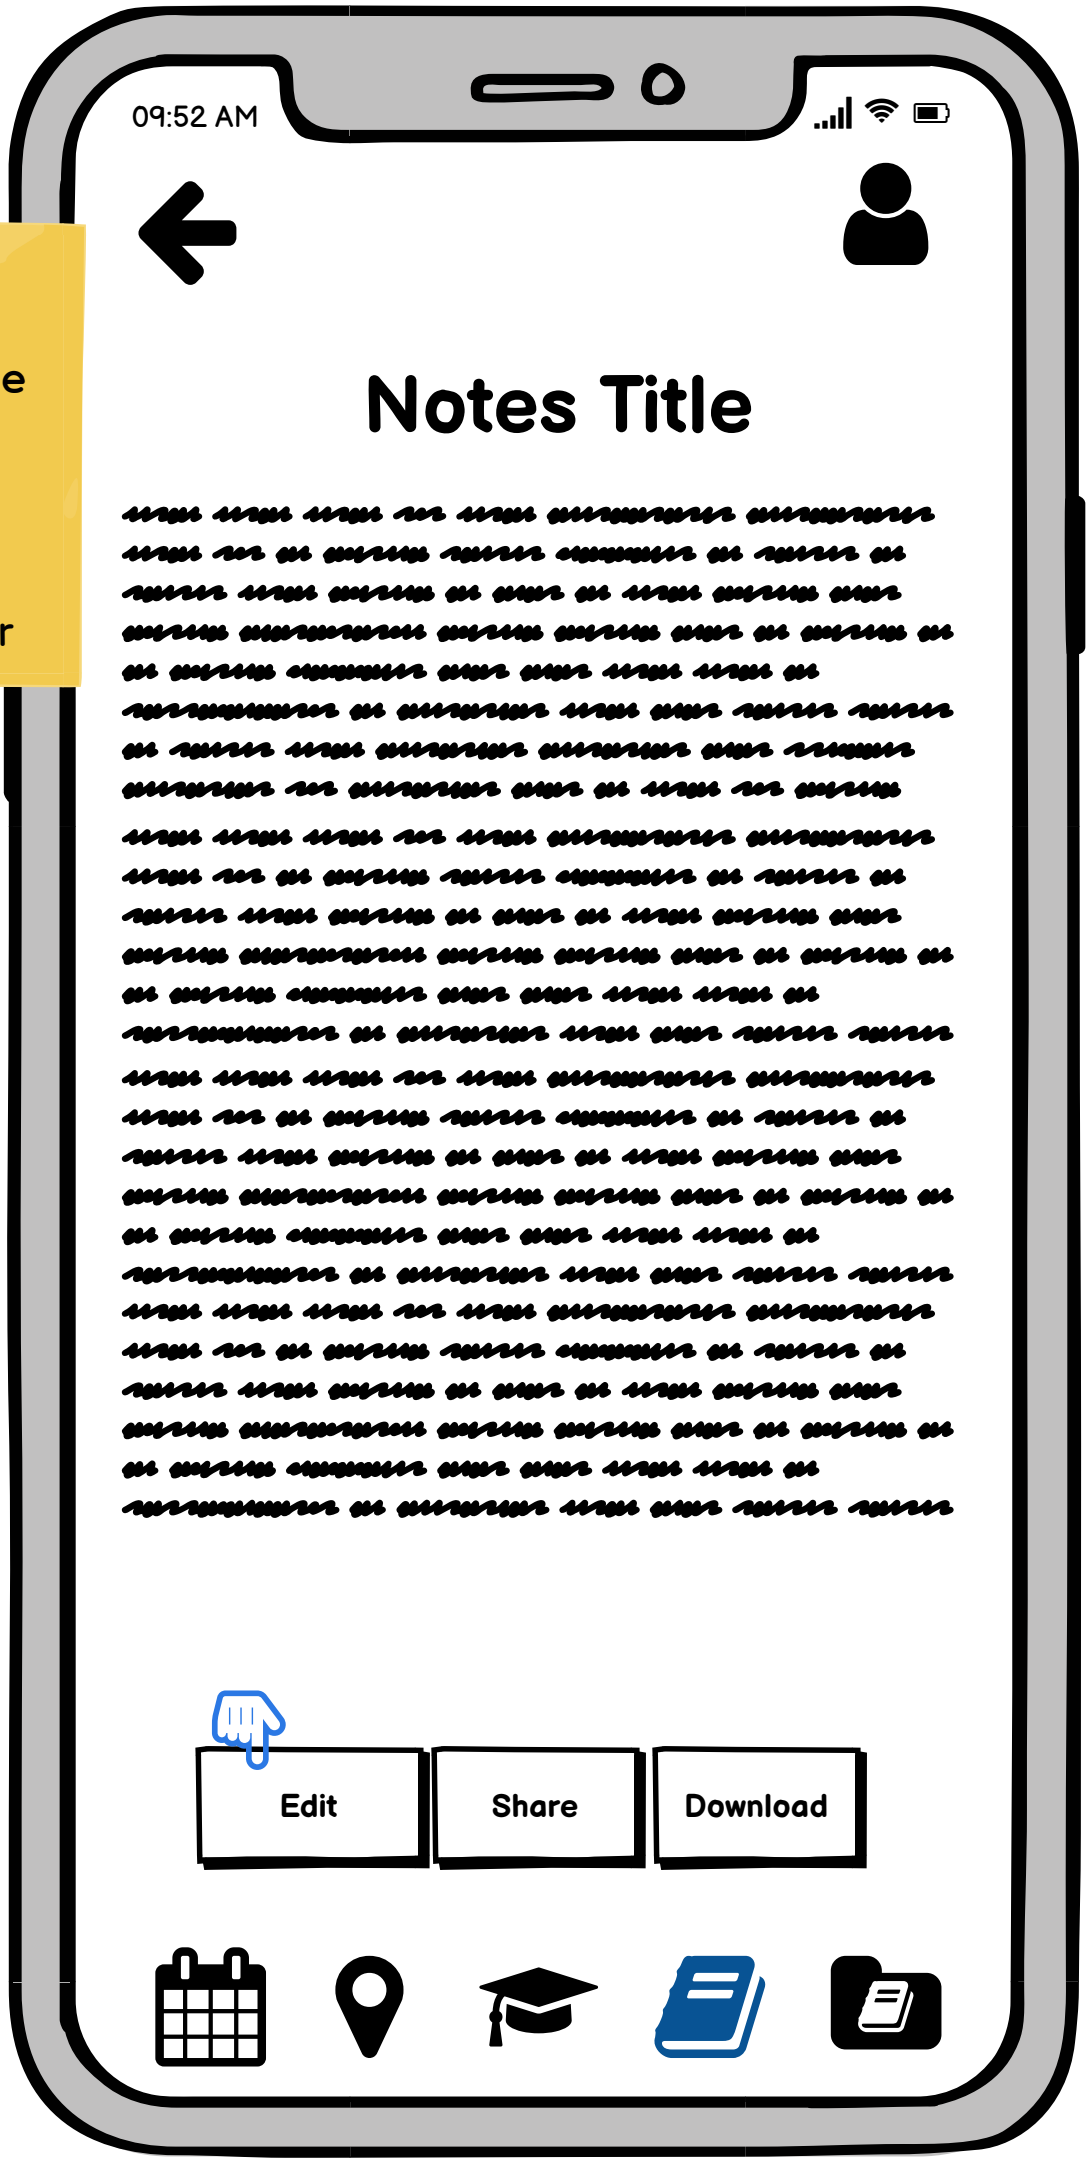
This page is opened when the user click on the notes icon. Here the user can see his notes organized by courses' name.



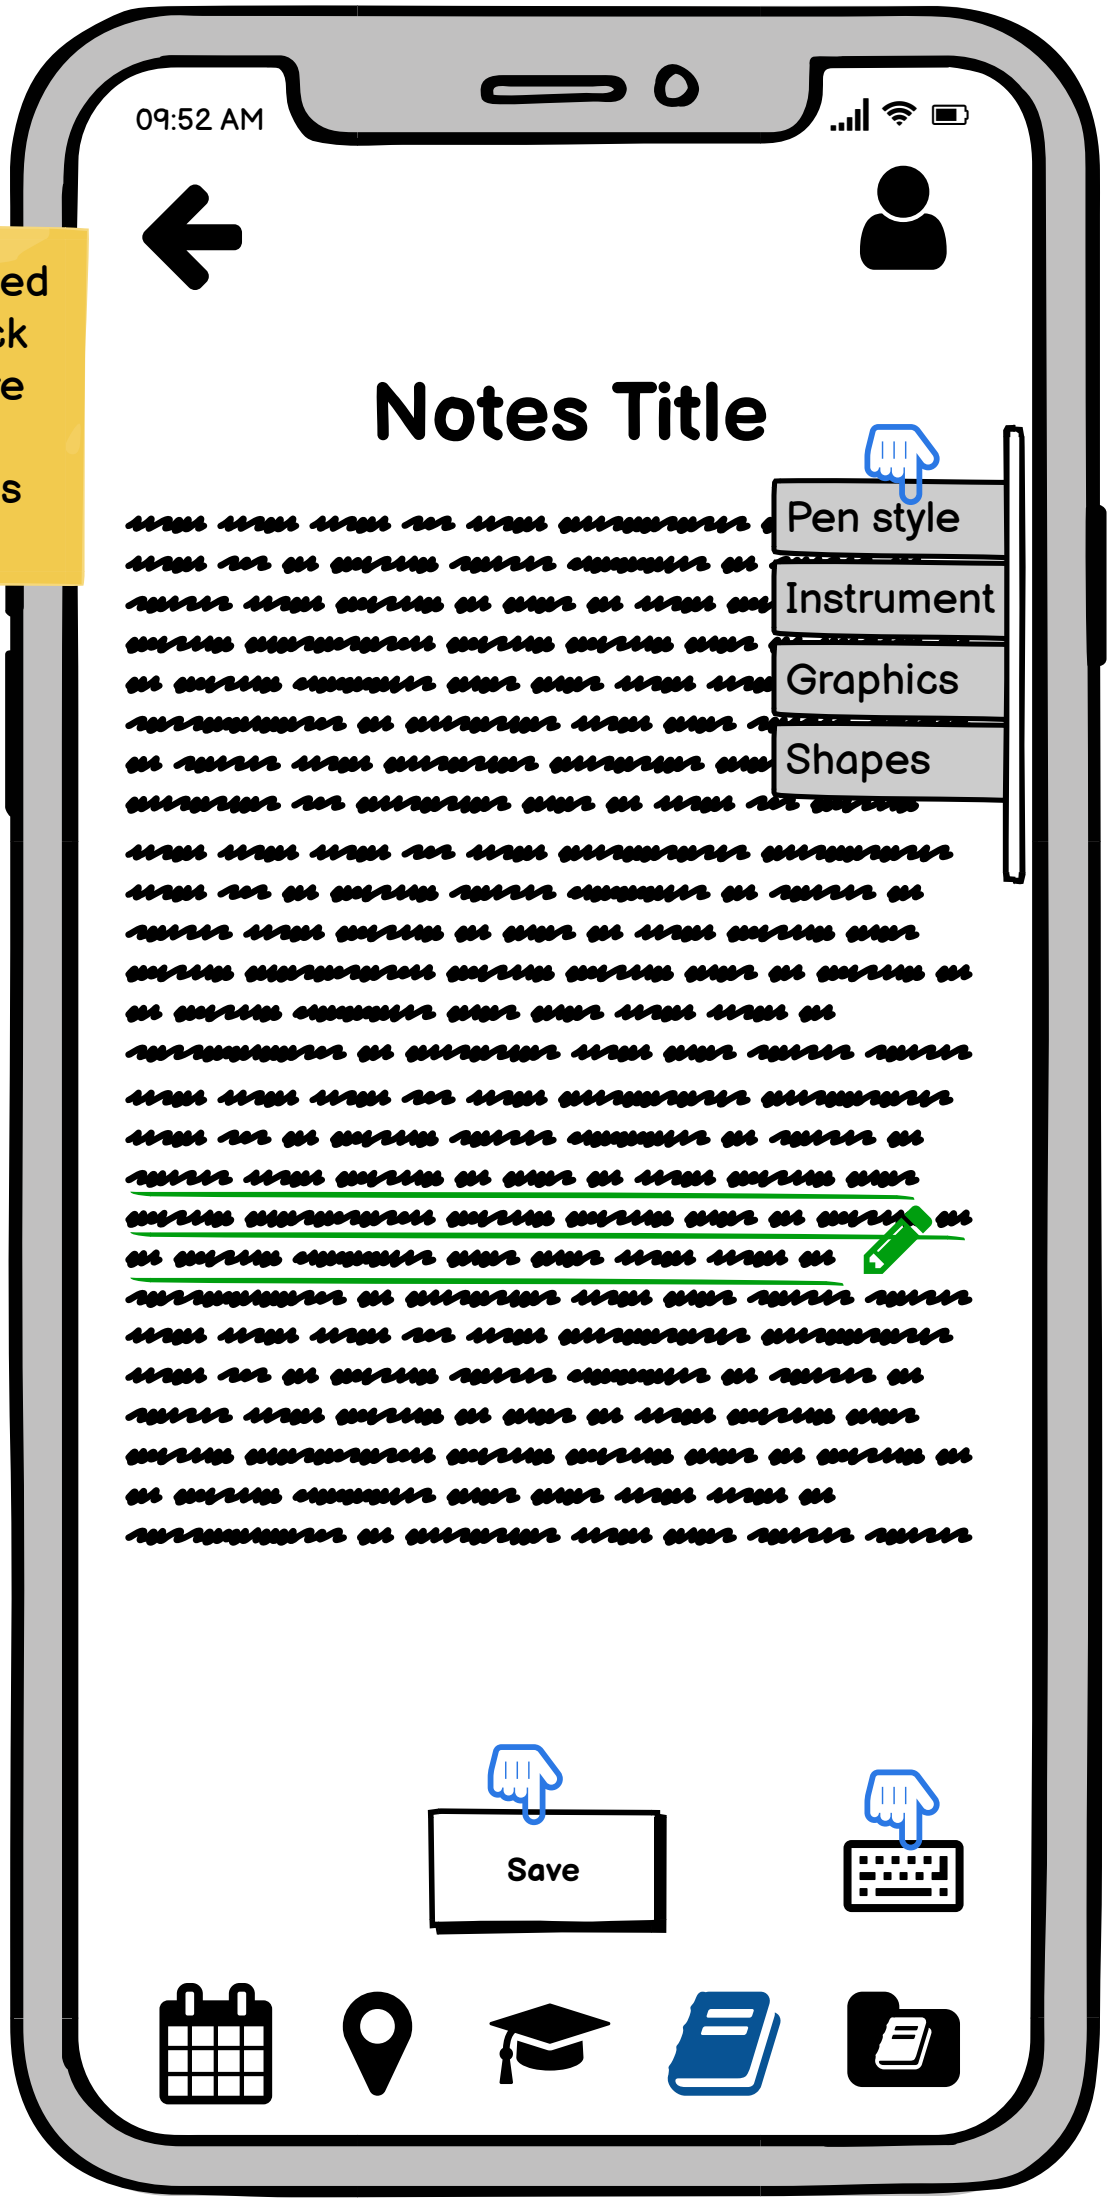
This page is opened when the user click on a private course's folder. Here the user can see his private notes.



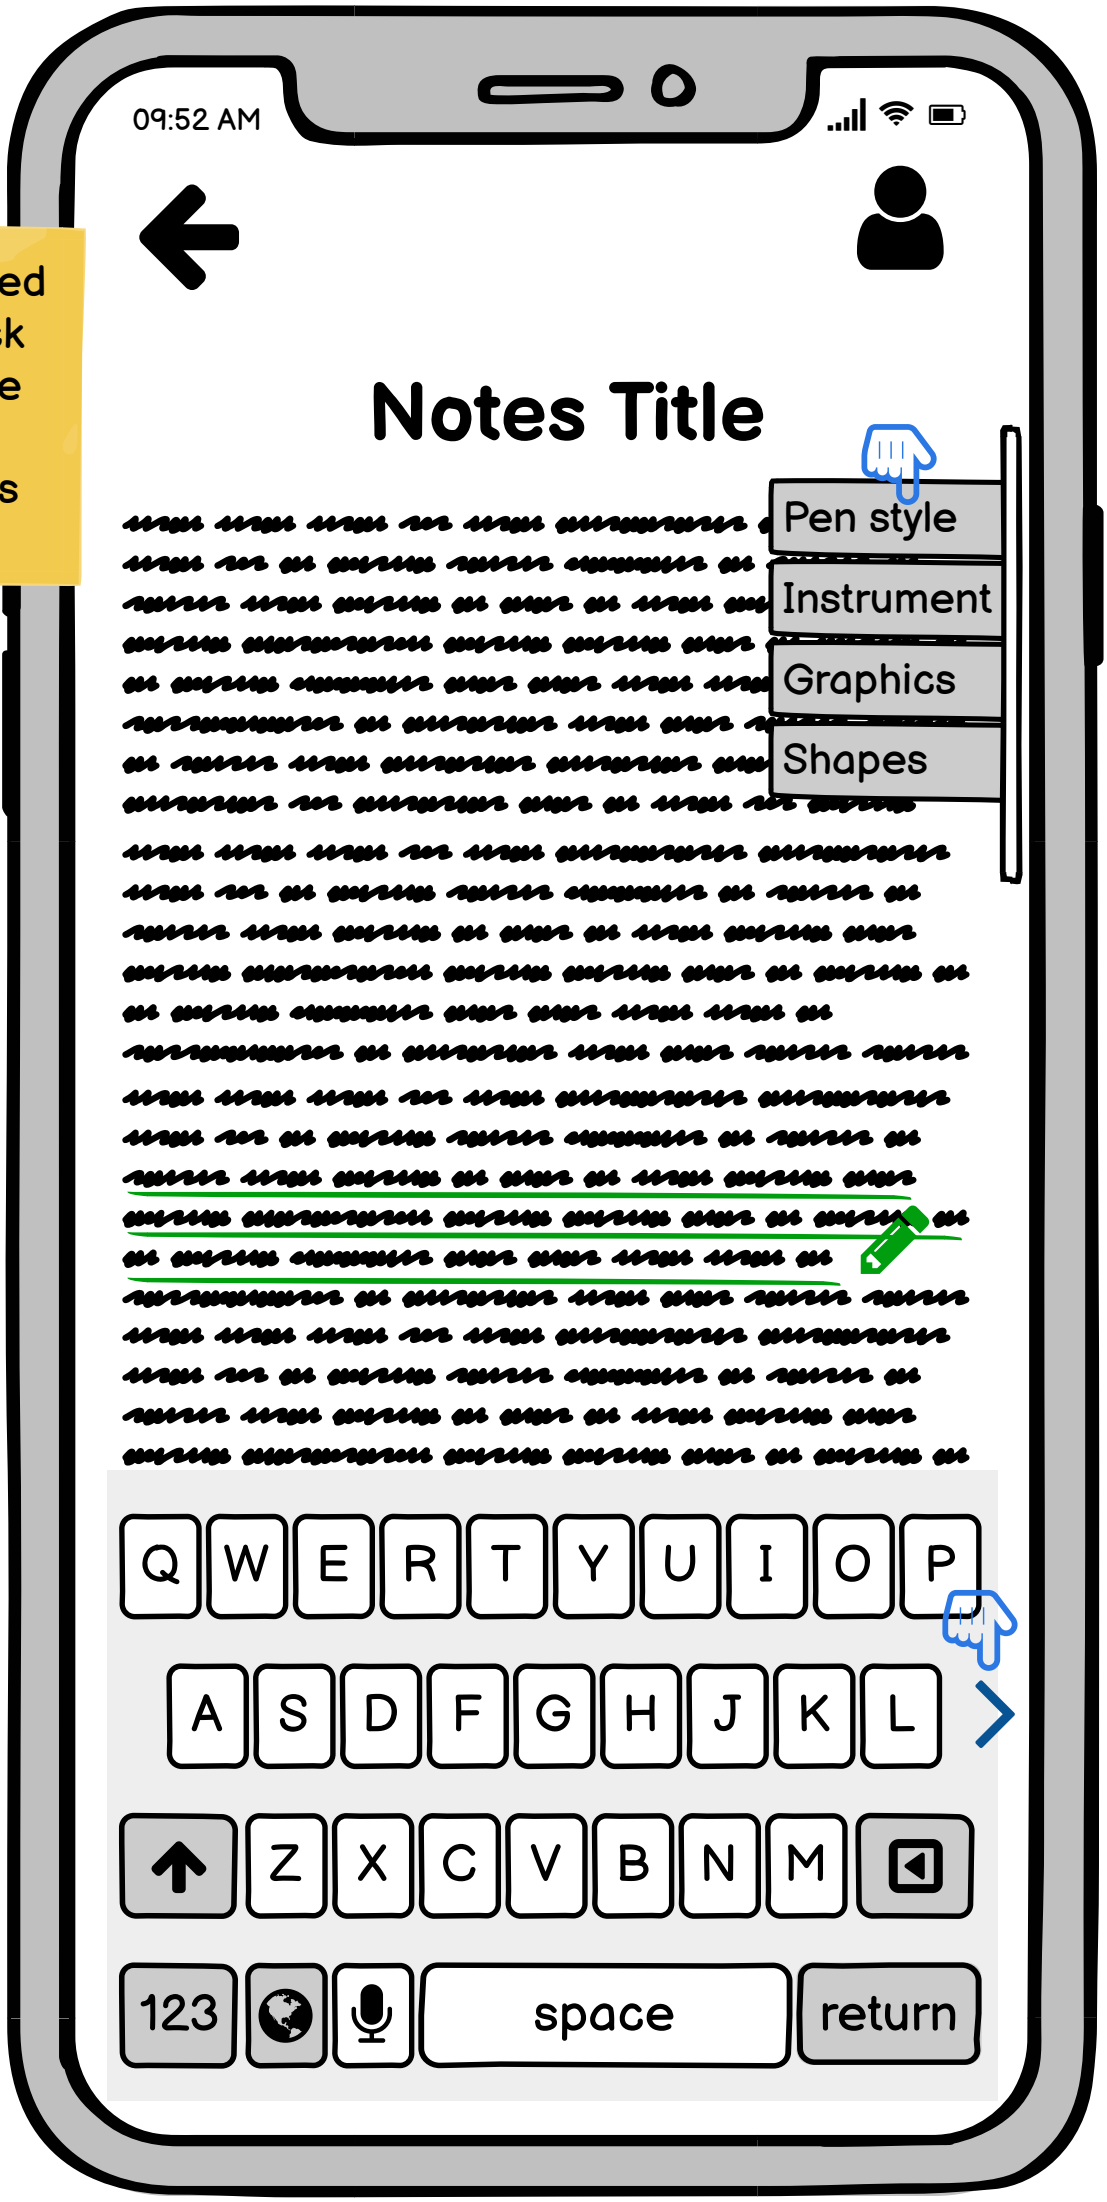
This page is opened when the user click on specific notes. Here the user can:
·Read notes;
·Edit notes;
·Download the notes;
·Share notes with other



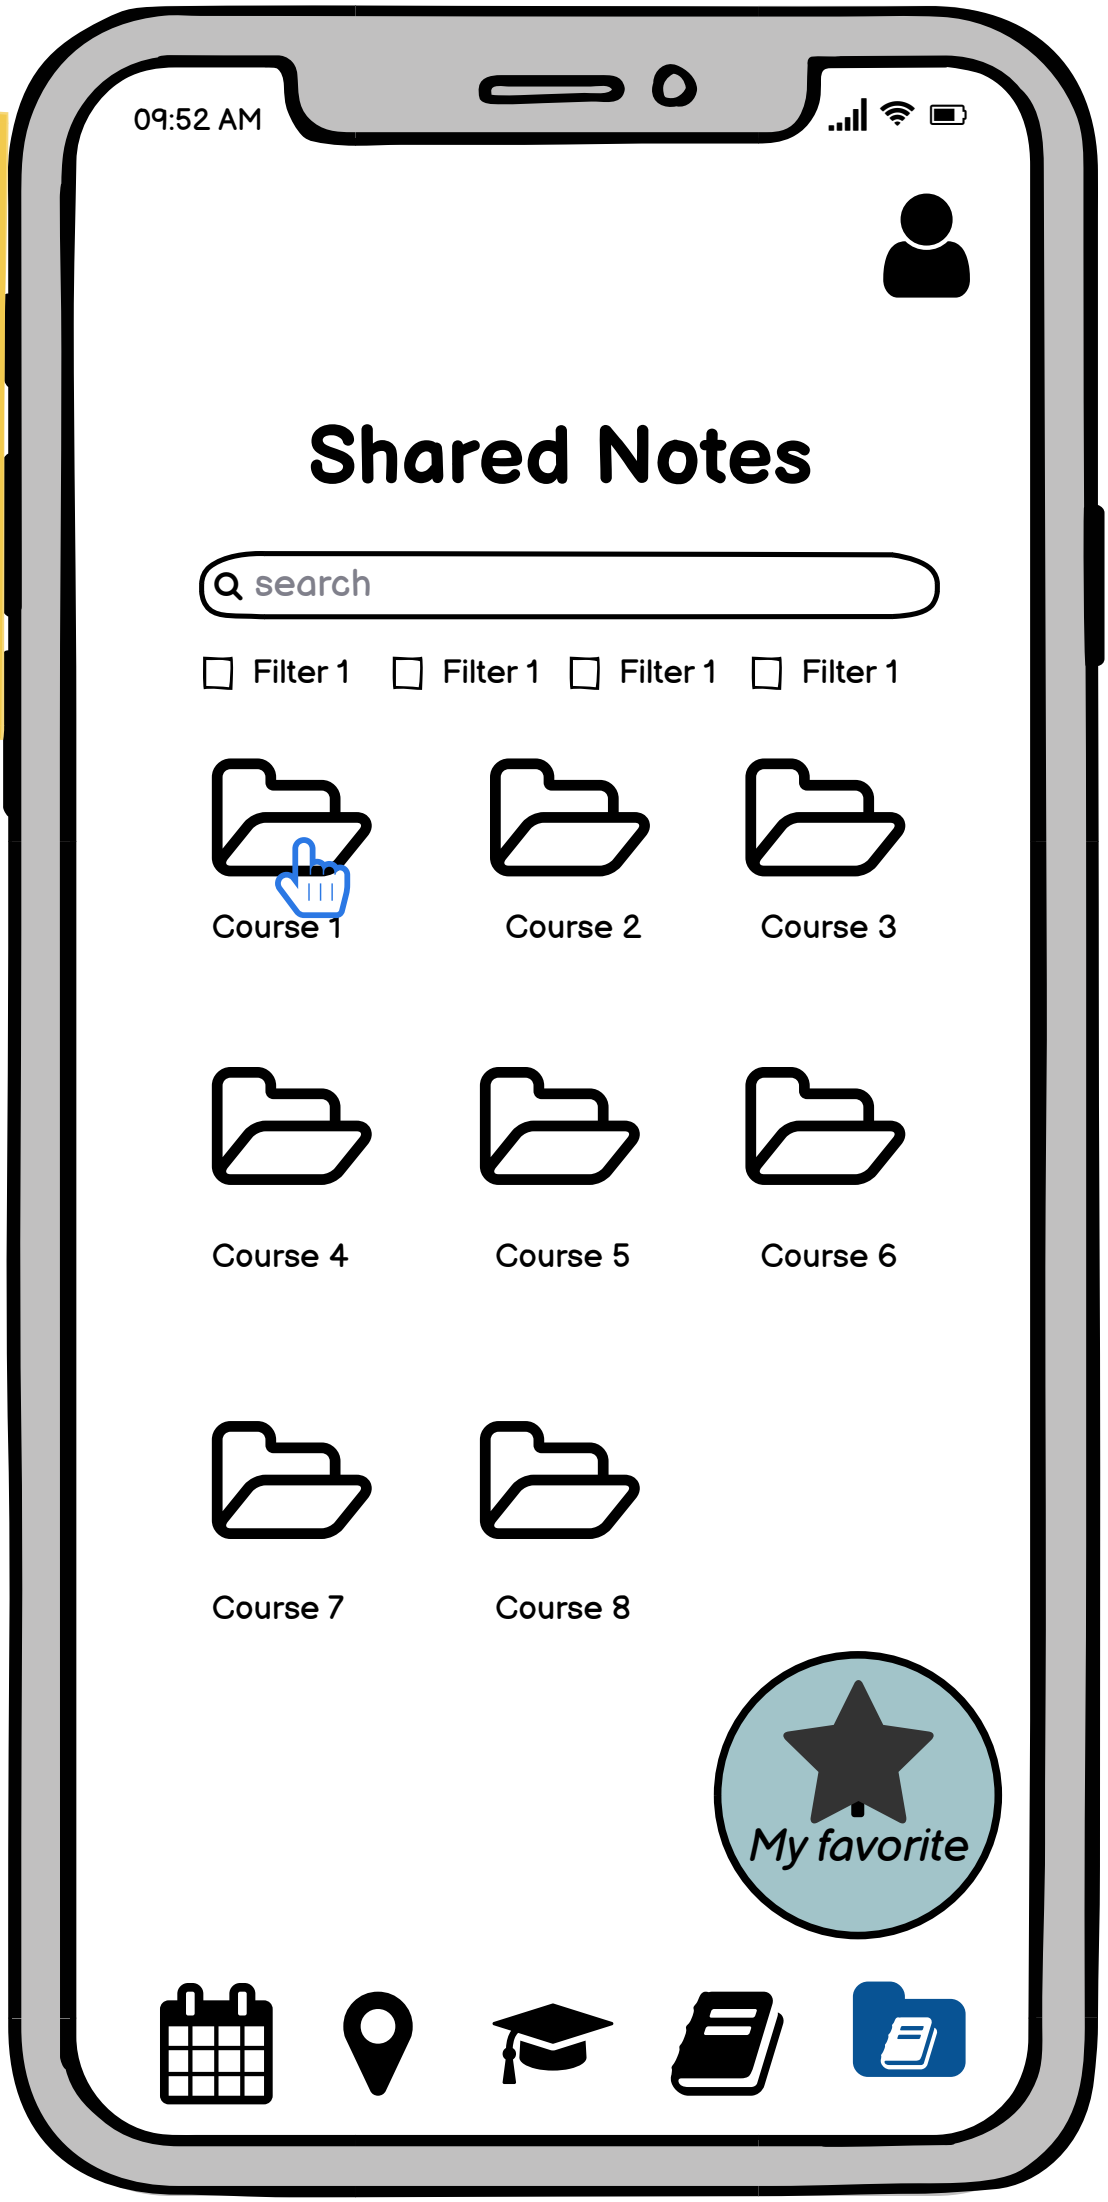
This page is opened when the user click on edit notes. Here the user can use the tools to edit his notes.



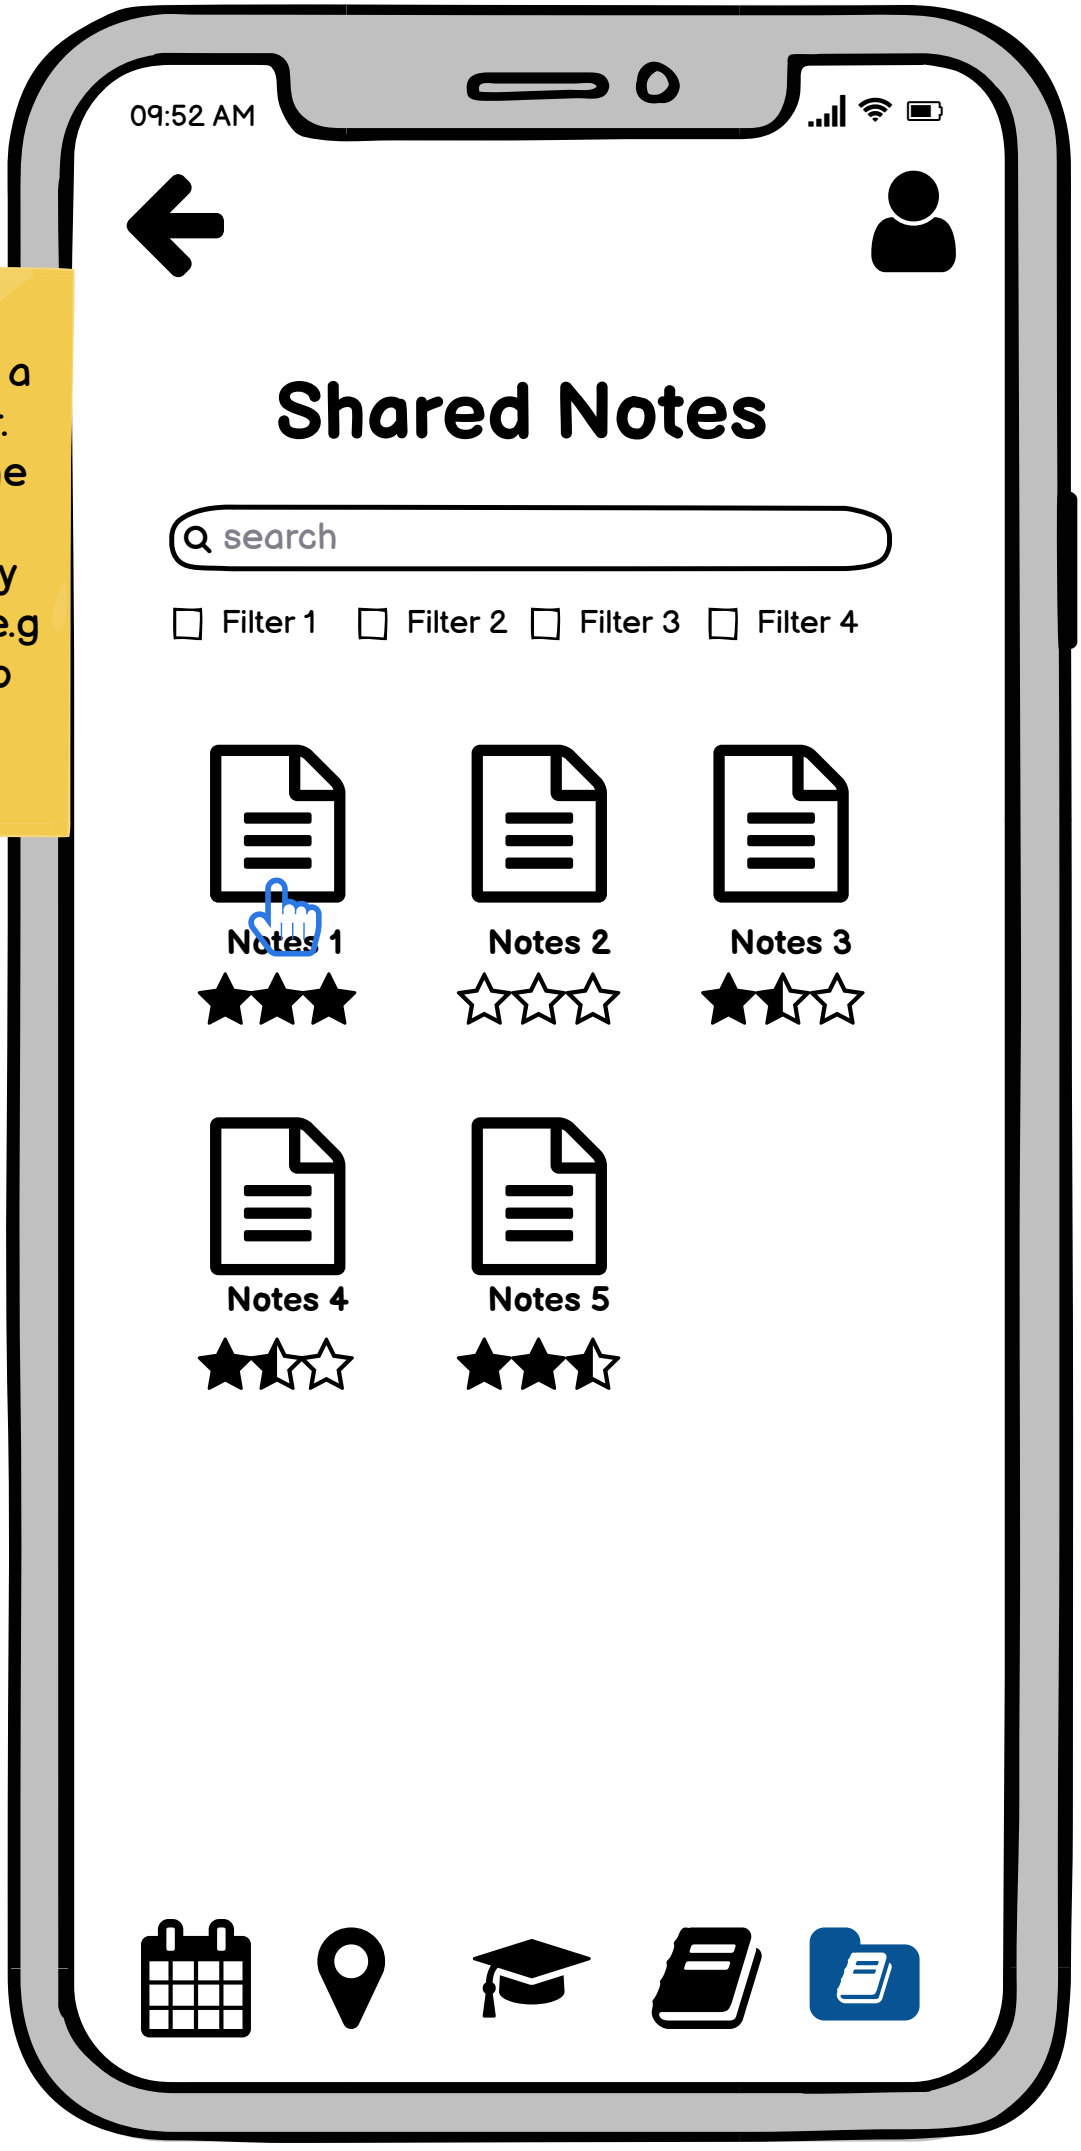
This page is opened when the user click on edit notes. Here the user can use the tools to edit his notes.



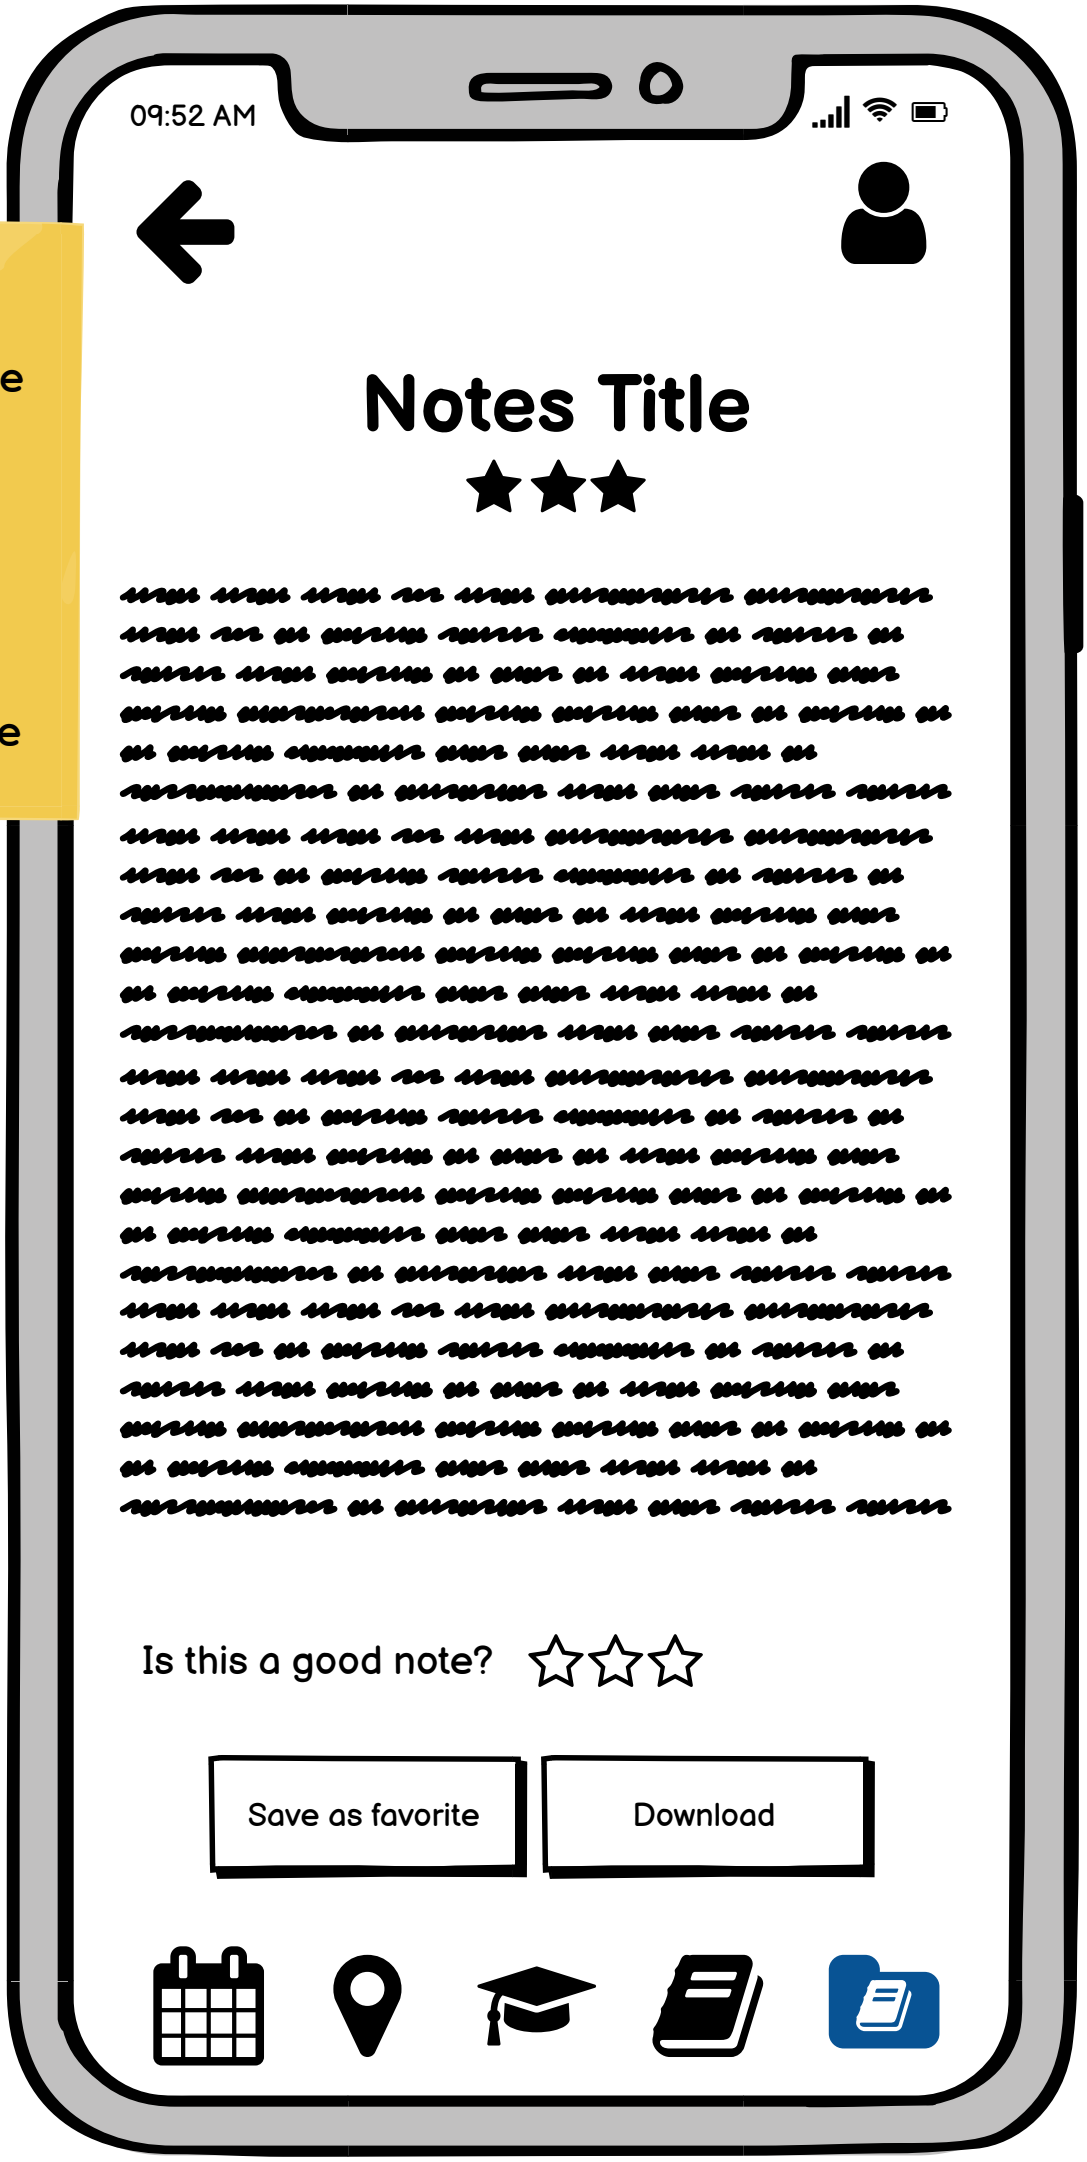
This page is opened when the user click on the shared notes icon. Here the user can see notes shared by other colleagues and these notes are organized by courses' name.



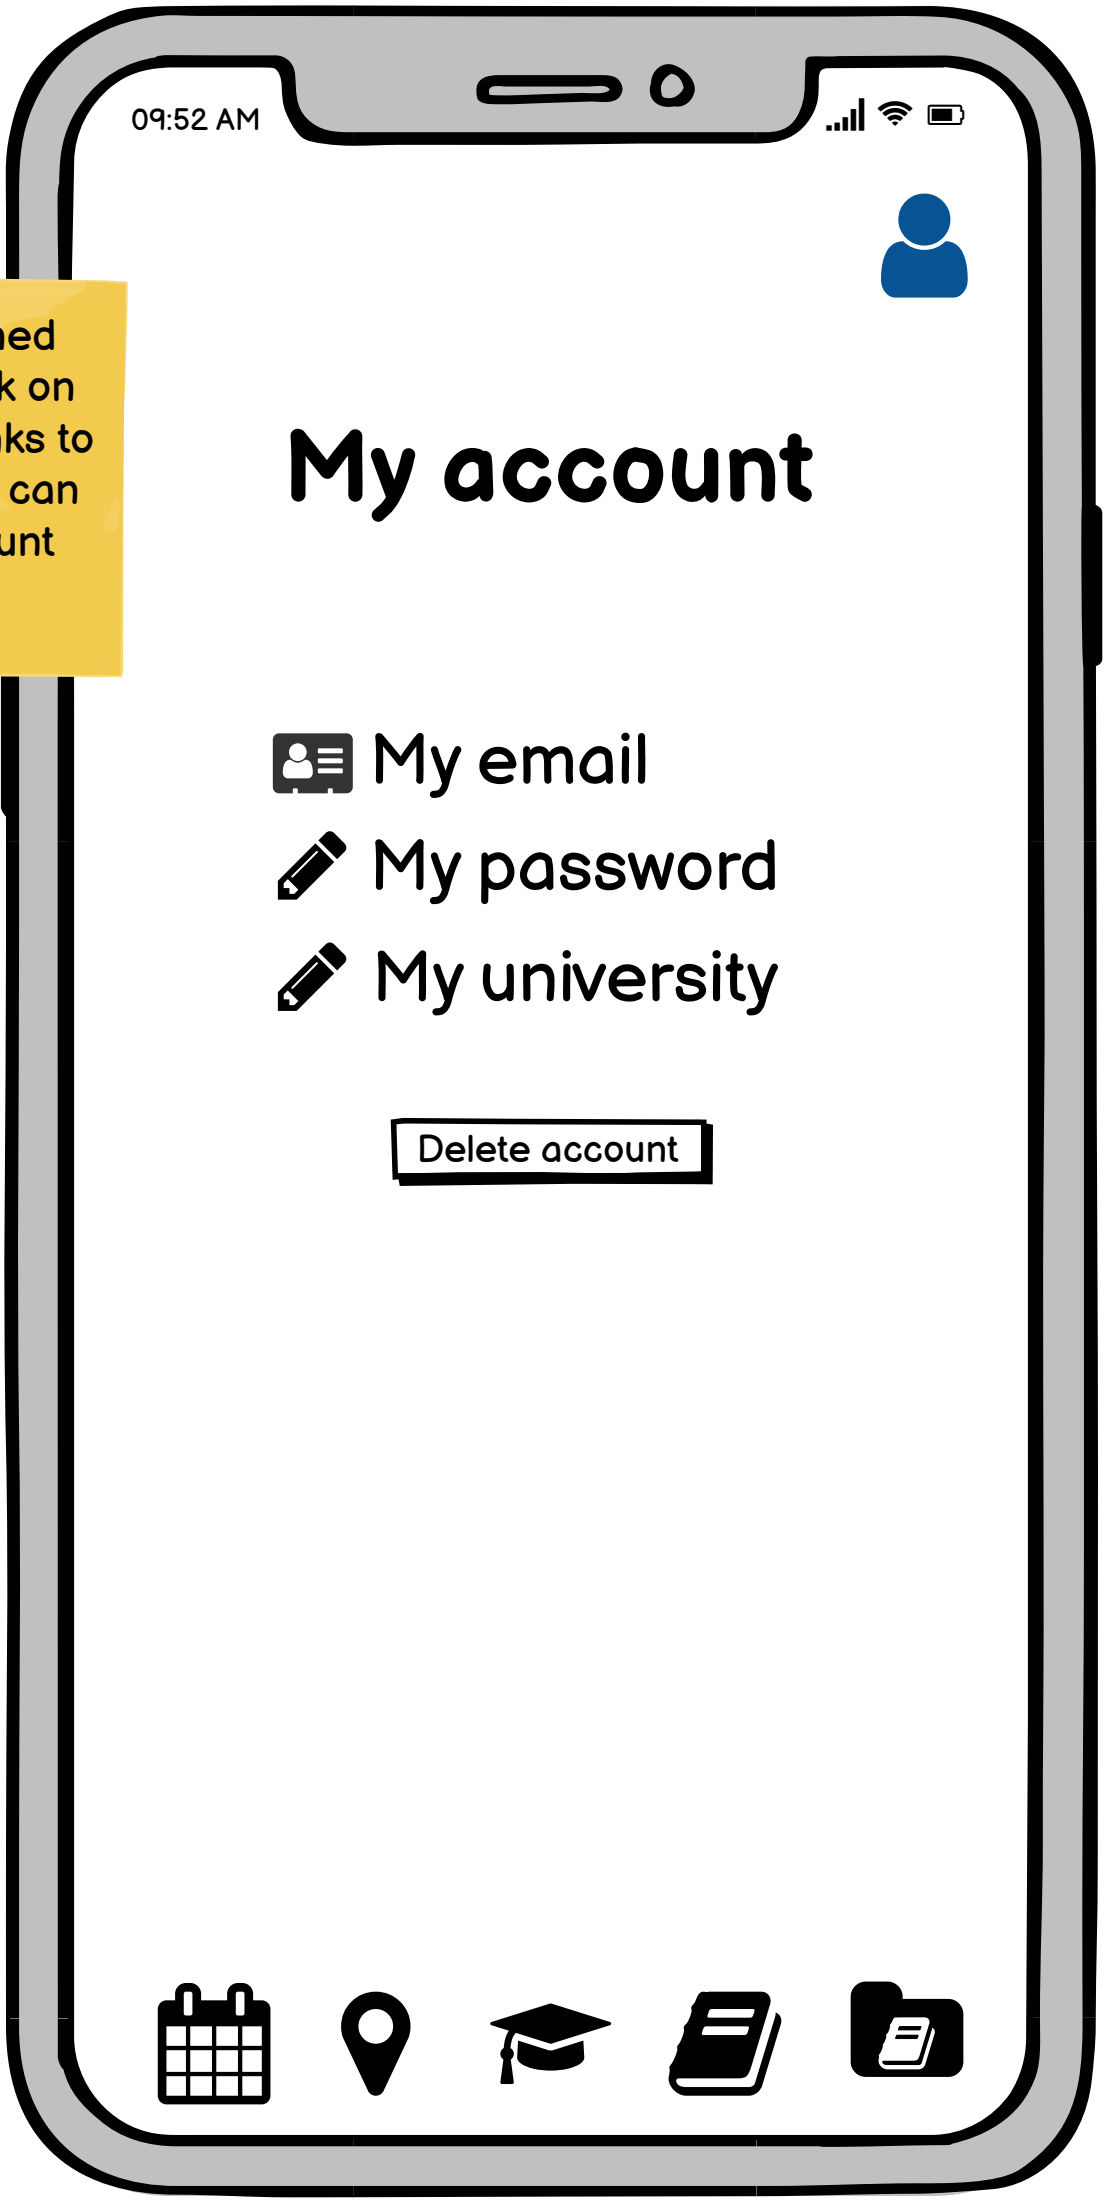
This page is opened when the user click on a specific course folder. Thanks to this page, the user can search the notes of his interest by applying many filters (e.g topic) and he can also see how these notes where rated.



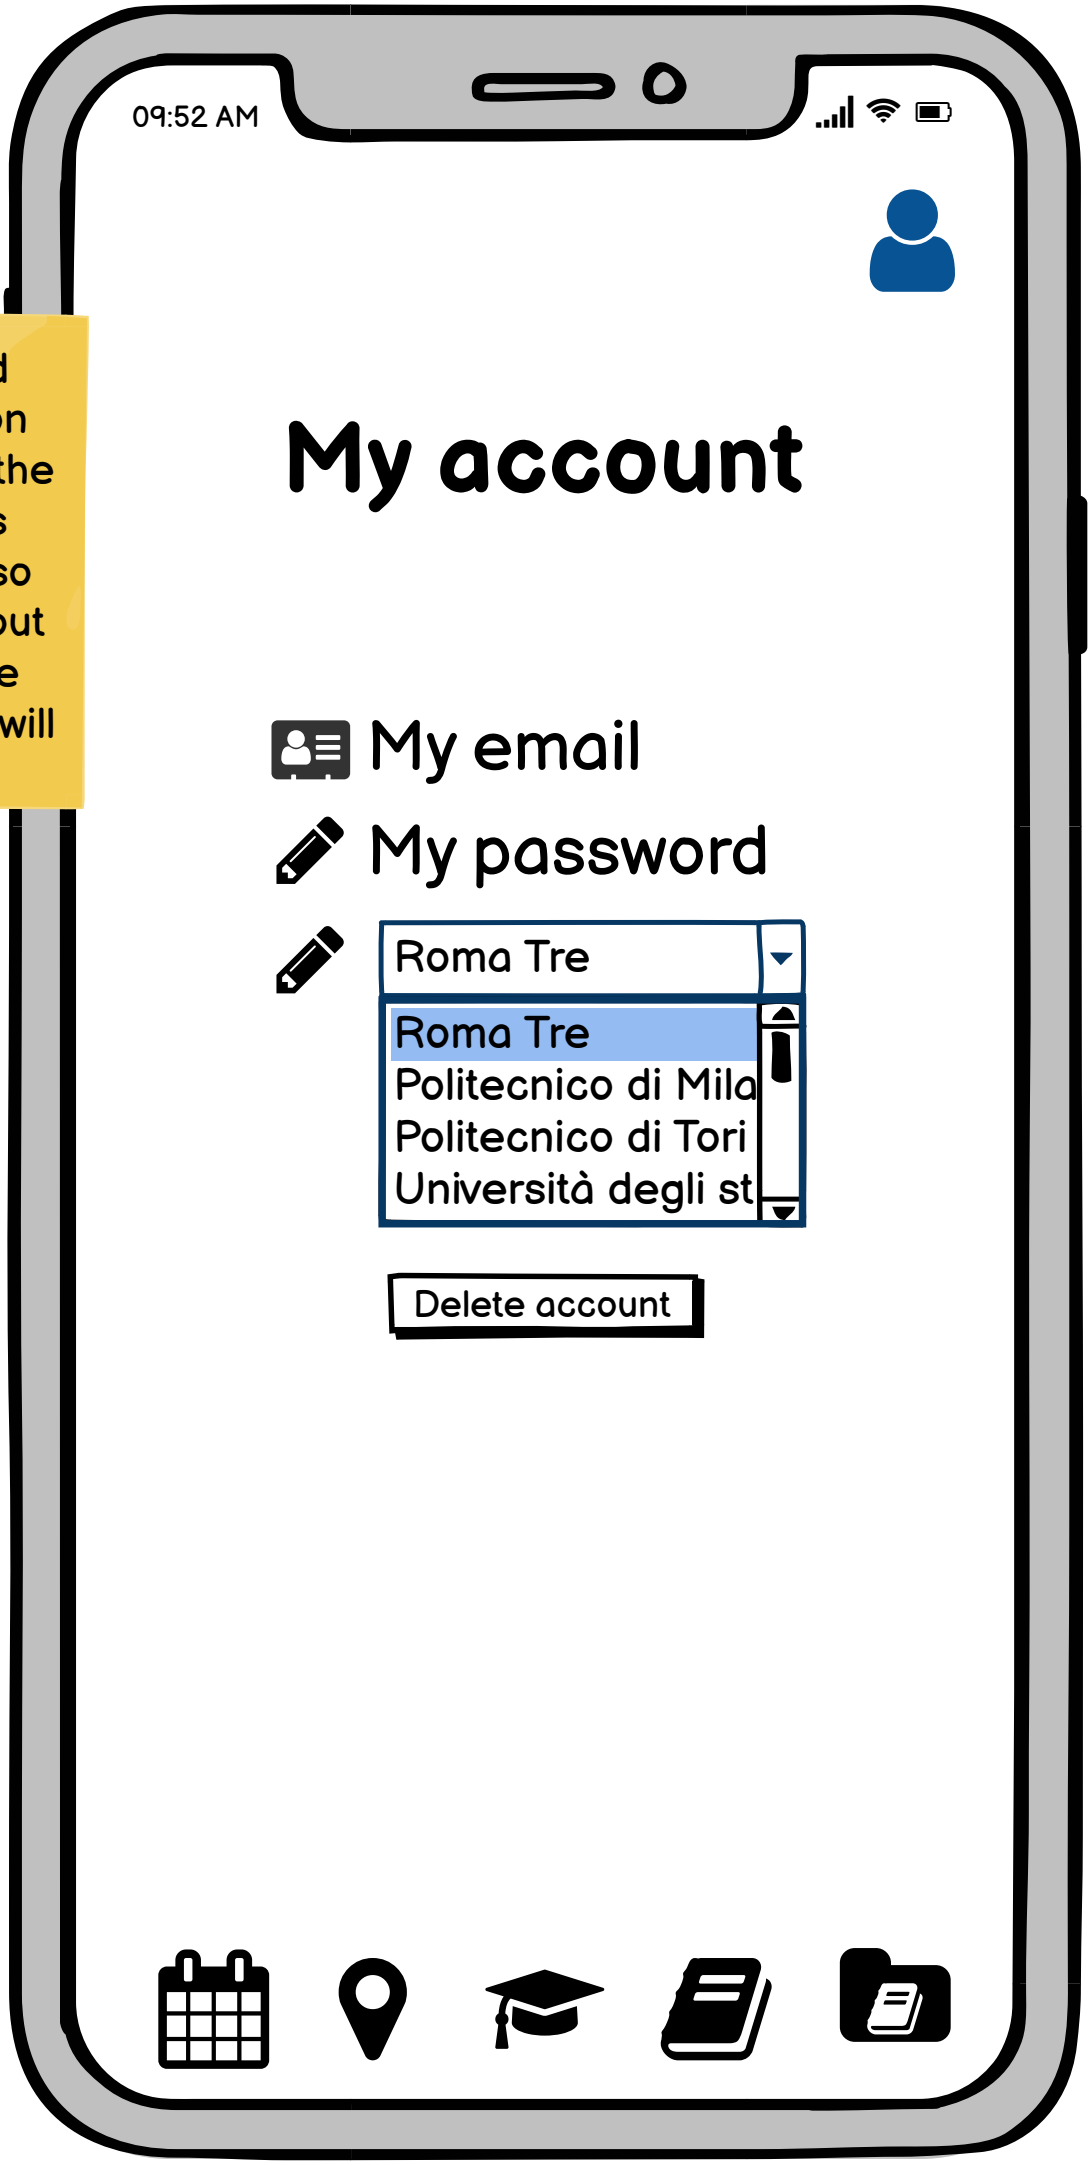
This page is opened when the user click on specific notes. Here the user can:
·Read notes;
·Mark notes;
·Save them in his personal section "Myfavorite";
·Download the notes he is reading.



This page is opened when the user click on the user icon. Thanks to this page, the user can manage his account settings.

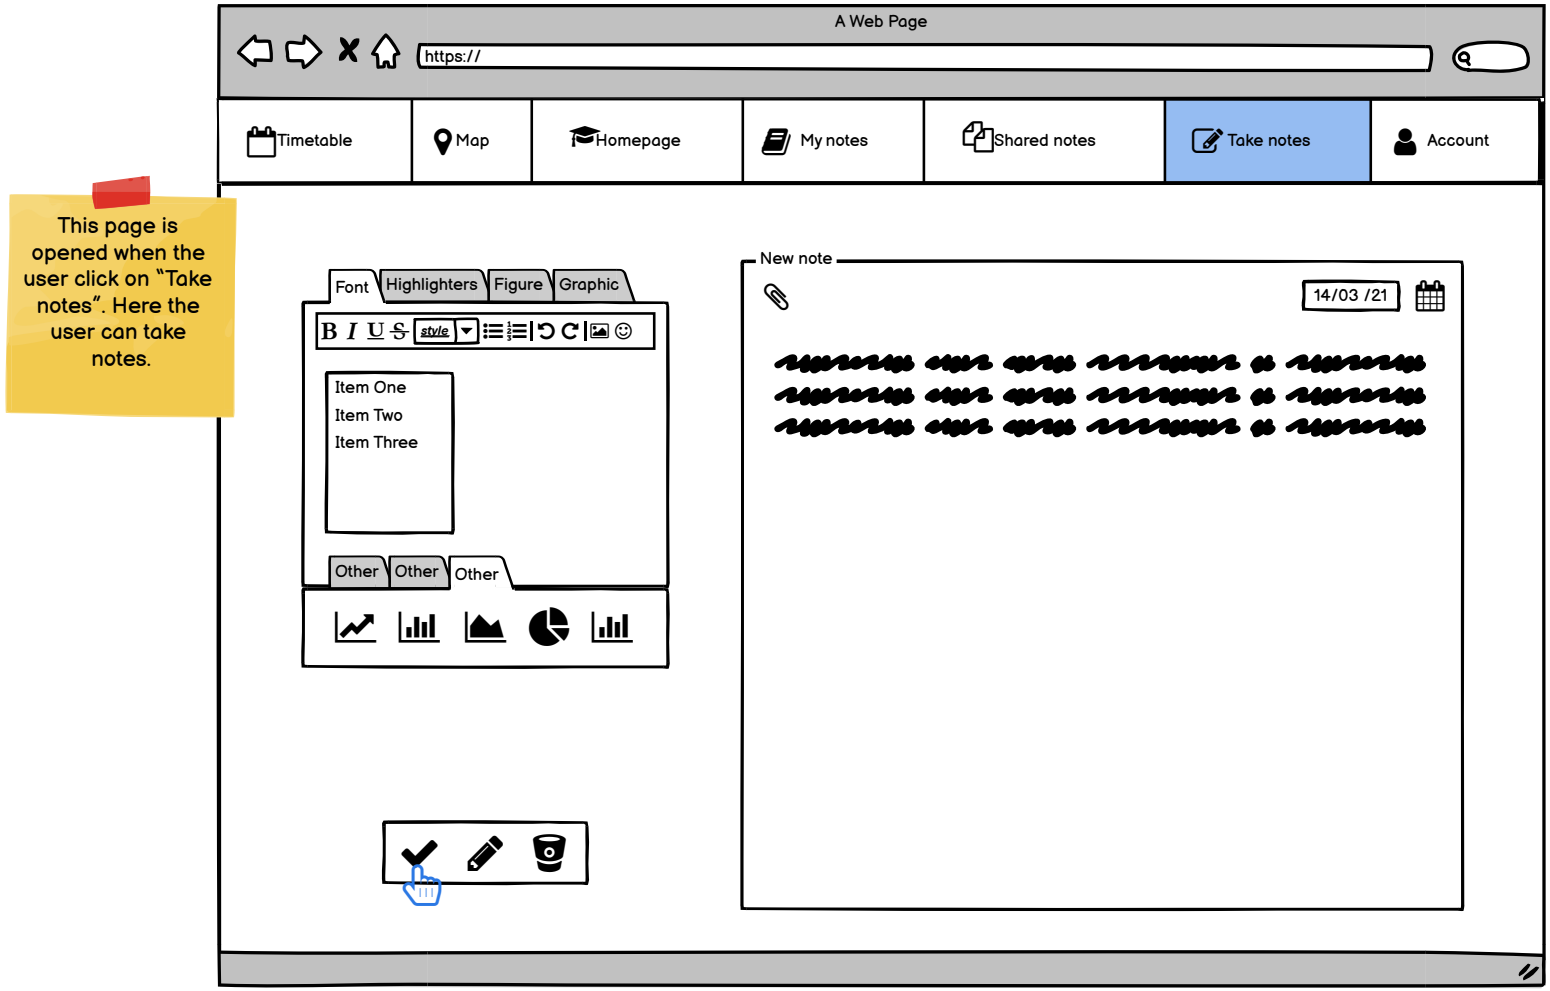


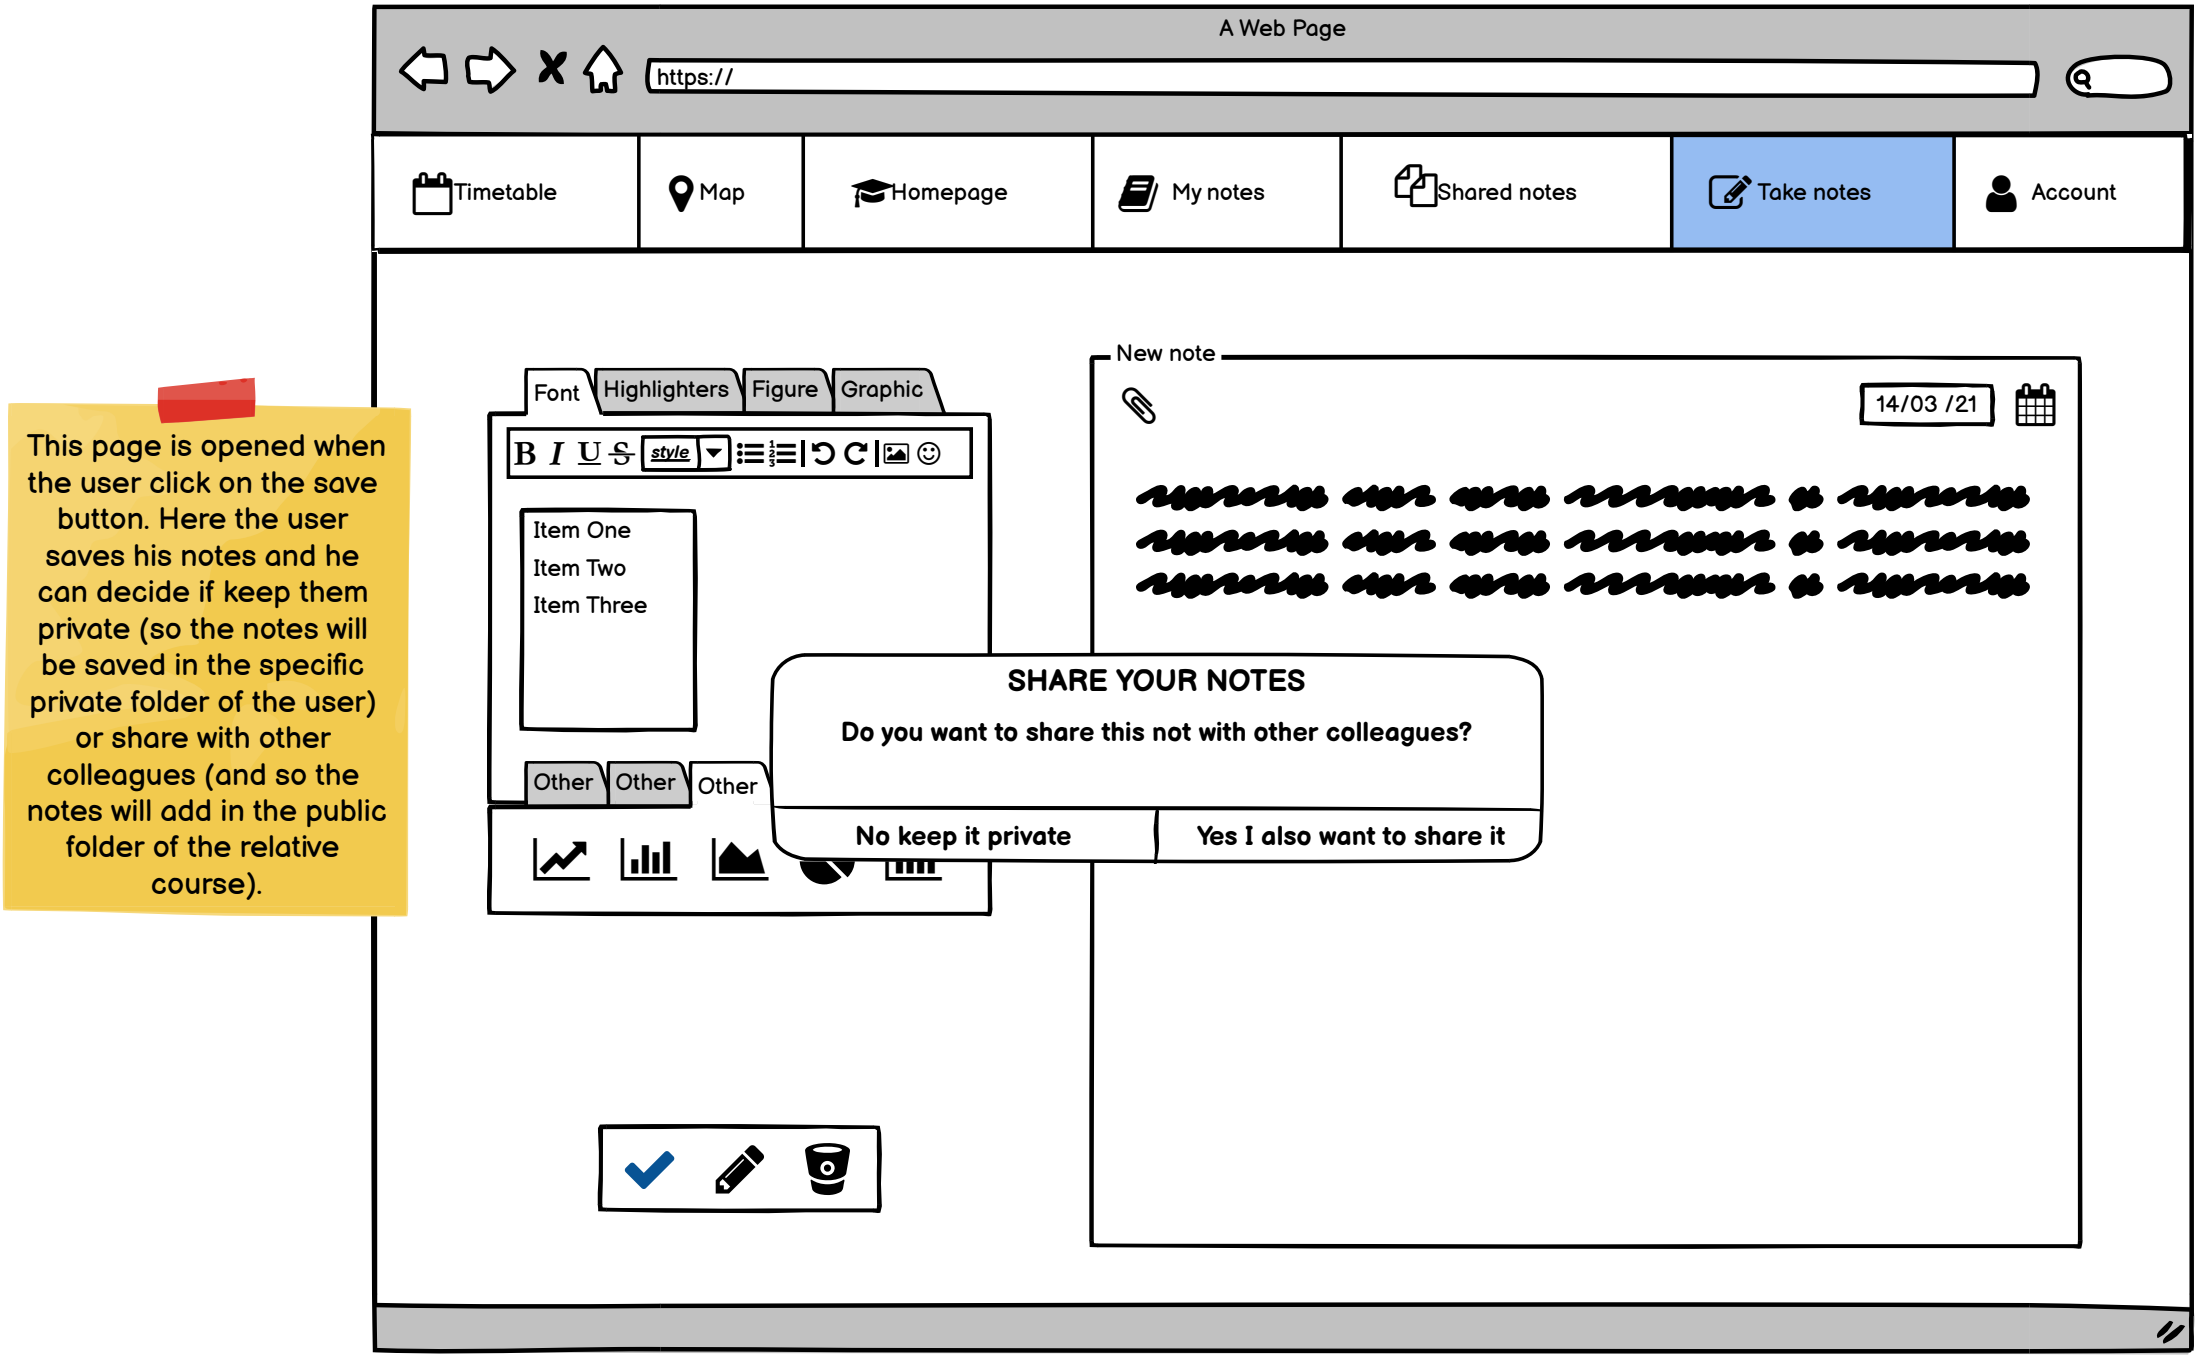
This page is opened when the user click on "My university". Here the user can change his university name and so all the information about university (e.g. course list, map university, ...) will be updated.



This page is opened when the user click on "Delete account" button. Here the user can delete his account if he doesn't want to use the app anymore.

Since our application is both desktop and mobile, all the previous mockups has to be implemented also for the desktop version. Moreover for the desktop version we offer the possibility to take notes on the application.





This page is opened when the user click on the save button. Here the user saves his notes and he can decide if keep them private (so the notes will be saved in the specific private folder of the user) or share with other colleagues (and so the notes will add in the public folder of the relative course).
